

## SS Physics I "Vocabulary to Know"

Newton's 3rd Law

No.	2825	Name
-----	------	------

in four digits

No.	English	remarks	Japanese	check
1	action / reaction	cause a reaction	作用 / 反作用	✓
2	identify	identity	特定の	✓
3	utilize	make use of	活用する	✓
4	dynamics	dynamically	力学	✓
5	in pairs	pairing	組む	✓
6	equal in magnitude	same magnitude	大きさが等しい	✓
7	opposite in direction	other way	向かう逆	✓
8	forward	the front	前方に	✓
9	backward	behind	後ろ向きに	✓
10	propel	push	押す、前進させる	✓
11	expand	grow bigger	膨張する	✓
12	in turn	next	次に	✓
13	contact	contactable	接触する	✓

- I learned <sup>law of</sup> action and reaction. I think it's more difficult because it's different to the others. A thing of action and reaction exists around us, so I want to understand the law.
- Action and reaction is in pairs and apply a force A to B and B to A. A to B and B to A is action and reaction, also they are same magnitude but direction is opposite. For example, if we receive a volleyball, a volleyball pushes our arms and our arms pushes a volleyball. They are equal in magnitude, but opposite in direction.
